SOFIA International Summit – K Ennico Smith

2017-07-02

- We worked through a list of topics for the first SOFIA International Summit (SIS) meeting to help articulate the range of perspectives from both communities regarding SOFIA and achieve a more cohesive working arrangement between our two communities.

- The co-chairs of the SIS, Andy Boden (Caltech) for the US and Jürgen Stutzki (Cologne) for German science communities were present and moderated the listing of topics.

- The working list of topics for the Mar 2-3, 2017 meeting are:
  - Charter for the SIS (Why are we here today)
  - Management Over View (How are we currently structured)
  - Science vision (Where to take SOFIA science in the future ++5yr landscape)
  - What’s coming up in Cycle 5
  - New Science Thematic Approaches & What we can introduce in Cycle 6?
  - Feedback of user/advisory boards – How are we using the input from our council? How can we use them differently
  - New Science Collaborative Approaches (US/DE)
  - How does DE interact with the larger European FIR Community
  - Expanding the SOFIA User Community (US/DE)
  - German Formula for Instrument Time
  - Future Science Instrument Development and ++5yr landscape
  - Student involvement in SOFIA-science (US/DE)
  - Science Productivity Metrics
  - Senior Review Discussion
