Instrument Roadmap - Discussion

• Upgrades – pro-con?
  • Are the upgrades scientifically exciting or should we focus efforts on new instruments?
    **Upgrades are useful if timely and not too disruptive**
  • Will they excite a SR panel?

• Time-lines
  • Is the shorter turn-around for an upgrade a good trade?
  • What is the longest “off-line” an upgrade is worth?

• Field rotators – required for all/some instruments?
  **A facility field-rotator would be a boon for e.g. slit spectroscopy**
